What Is Claimed Is

- 2 1. A card corner cutter including:
- a body defining a chamber with an open upper end for receiving
- 4 scraps;

1

- 5 a first blade secured to the body and located next to the chamber;
- 6 a handle pivotally mounted on the body; and
- 7 a second blade secured to the handle.
- 8 2. The card corner cutter according to claim 1 wherein the chamber
- 9 includes an open lower end for releasing the scraps, and the card
- 10 corner cutter further includes a cover for closing the open lower end
- of the chamber.
- 12 3. The card corner cutter according to claim 2 wherein the cover is
- pivotally attached to the body.
- 14 4. The card corner cutter according to claim 3 further including a tube
- formed on the wall of the chamber and a column formed on the cover
- for insertion in the tube so that the cover firmly closes the open lower
- end of the chamber.
- 18 5. The card corner cutter according to claim 3 wherein the cover is a
- 19 portion of a tray attached to the body.
- 20 6. The card corner cutter according to claim 5 further including a tube
- formed on the wall of the chamber and a column formed on the cover
- for insertion in the tube so that the cover firmly closes the open lower
- end of the chamber.
- 24 7. The card corner cutter according to claim 5 further including a
- 25 plurality of tubes formed on the body and a plurality of columns
- formed on the top of the tray for insertion in the tubes so that the tray

- is attached to the body.
- 2 8. A card corner cutter including:
- a body defining a chamber with an open upper end for receiving
- 4 scraps;
- a first blade secured to the body and located next to the chamber;
- a second blade pivotally mounted on the body; and
- 7 a handle pivotally mounted on the body for pushing the second
- 8 blade.
- 9 9. The card corner cutter according to claim 8 wherein the chamber
- includes an open lower end for releasing the scraps, and the card
- corner cutter further includes a cover for closing the open lower end
- of the chamber.
- 13 10. The card corner cutter according to claim 9 wherein the cover is
- pivotally attached to the body.
- 15 11. The card corner cutter according to claim 10 further including a tube
- formed on the wall of the chamber and a column formed on the cover
- for insertion in the tube so that the cover firmly closes the open lower
- end of the chamber.
- 19 12. The card corner cutter according to claim 10 wherein the cover is a
- 20 portion of a tray attached to the body.
- 21 13. The card corner cutter according to claim 12 further including a tube
- formed on the wall of the chamber and a column formed on the cover
- for insertion in the tube so that the cover firmly closes the open lower
- end of the chamber.
- 25 14. The card corner cutter according to claim 12 further including a
- 26 plurality of tubes formed on the body and a plurality of columns

- formed on the top of the tray for insertion in the tubes so that the tray
- 2 is attached to the body.
- 3 15. The card corner cutter according to claim 8 wherein the second blade
- 4 is shaped as a triangle including a hypotenuse put in a recess defined
- 5 in the body.
